

# FORKLIFT iQ360

Our comprehensive fleet management system provides your business with efficient three-way communication between supervisors, forklift vehicles, and drivers.

## Forklift iQ360 Gives You:

- Access only for authorised drivers
- Pre-shift checks specific to your operations
- Fleet management reporting
- Impact reporting

The Collective Intelligence Group is committed to enabling small, growing businesses to access and benefit from the same technology as larger businesses. Forklift iQ360 is designed to support smaller businesses by ensuring the safety and compliance of their operations, improving productivity and reducing the cost of their forklift operations.

Forklift iQ360 serves as the eyes and ears of forklift operations managers, enabling them to monitor and keep track of important activities and events, for the purpose of maintaining high levels of safety, productivity and profitability.

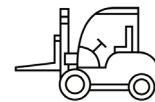

### Increased Safety

Forklift iQ360 monitors and reports operator performance. This enables management to intervene in situations where operators, vehicles or tasks are repeatedly involved in damage or safety-related incidents.

### Control Costs

Forklift iQ360 collects real-time data to improve operations through individualized reporting. This leads to lower repair costs to vehicles and property, reduced operator turnover, and lower training costs.

### Improve Productivity

The Forklift iQ360 system monitors working hours to minimize productivity losses. By tracking daily operator activity, supervisors can easily detect safety violations and performance inefficiencies.

## About Forklift iQ360

- Compatible with android smartphones
- PIN screen entry, no RFID cards required
- Easy to install across a network of vehicles, independent of vehicle brand
- Simplify communication between supervisors and operators
- Customize Forklift iQ360 safety and control features
